

Skill-Enhancement Training Short Courses and Workshops Offering

Independently accredited workshops and short courses

At AISee Collaborative, we have taken a collaborative partnership approach bringing together the lived/living/professional knowledge and experience to create training and occupational learning workshops and short courses.

All workshops and short courses have been independently accredited and are delivered by an Institute of Training and Occupational Learning (ITOL) Accredited facilitator(s)/trainer(s).

All workshops and short courses are produced using our taxonomy of approach and learning, incorporating the practices of #CIHA, #CPERG, #IRL for #PCP with a delivery mode of discussional, auditory and visual presentation

Our feedback evidence from participant evaluation suggests our typical knowledge transfer and practice improvement is:

88.94%
